Testimony :

« The ESIM's advantages are their tailor-made filtration systems and their rewinding solutions for filter element for their self-cleaning filters, which considerably reduce implementation and maintenance costs. »

ESIM SAS

La filtration sur mesure

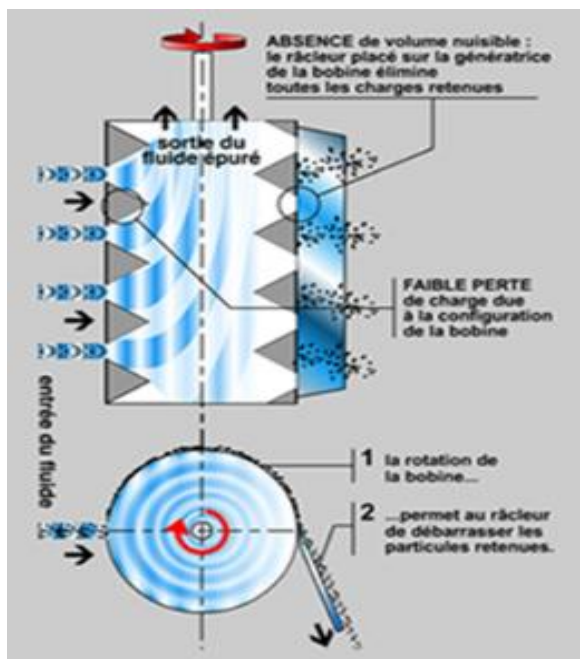

The Flexibility ESIM

Thank to its engineering department, ESIM SAS is able to meet all your fluid filtration needs thanks to multiple technologies.

Our filtration systems

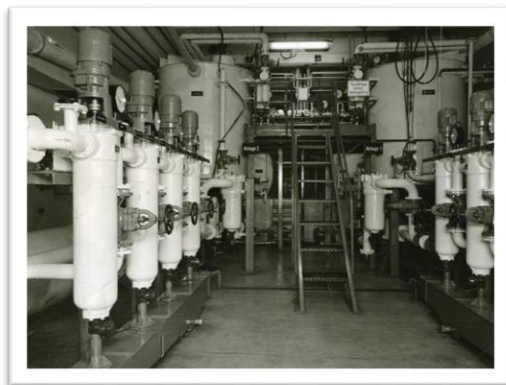

Our products are divided into 4 categories:

- The **self-cleaning filters for industry** whose cleaning is obtained by the action of the scrapers on the rotating filter bobbins.

- The **self-cleaning filters for Navy,**
- The **Filters fitted with consumables**

Since 1978 ESIM SAS equips all surface boats and submarines of the French Navy and the Foreign Navies.

Our professionalism, our reactivity and our quality level, allow us to always be part of the supplier's panel in specific equipment and also in the manufacture of spare parts on plans for French NAVAL GROUP and Foreign NAVAL GROUP (ex DCNS).

For more information about our technologies, do not hesitate to contact us and to consult our website.
